PROJECTS

MERN: Food Ordering App / React JS, MongoDB, Express.js, Node.js

- Built an online food ordering platform using the MERN stack, enabling customers to browse and order food seamlessly.
- Developed user-friendly interfaces for browsing and ordering food.
- Developed RESTful APIs with Express.js for secure order and payment management.
- **Responsibilities:** Full Stack Development.

Github Repository

AI Based Resume Analyzer and Job Recommender / Python, Jupyter Notebook, Streamlit, Gemini APIs, OCR

- Developed an AI-powered Resume Analyzer that evaluates resumes by providing a resume score, identifying skills, strengths, and weaknesses.
- Implemented a job recommendation system that matches required job skills with extracted skills from the resume.
- Enabled users to enter their preferred job role to view the essential skills required for that position.
- **Responsibilities:** Backend Development

Github Repository

ML: Movie Recommendation System / Jupyter Notebook, Pycharm, Kaggle

- Built a movie recommendation system that suggests films based on user-selected preferences and current trends.
- Conducted data analysis on movie datasets to identify patterns and improve recommendation accuracy.
- Utilized NLP models to enhance movie suggestions by understanding user preferences.
- **Responsibilities:** Data Analysis, Py charm, NLP Model

Github Repository

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java, PHP, JavaScript

AI/ML & Data Science: NLP, OCR, Pandas, NumPy, Matplotlib

Web Development: HTML, CSS, React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Technologies: Jupyter Notebook, RESTful APIs, Web Sockets
